Overview

Dr. R N Srivastava is a highly experienced Paediatric Nephrologist based in South Delhi, Delhi, with an extensive career that spans over 50 years. His rich background in pediatric medicine is underpinned by prestigious qualifications including MBBS, DCH, Dip (ABP), and MRCP, marking him as a leading expert in his field. Dr. Srivastava specializes in diagnosing and treating kidney-related issues in children, ensuring that young patients receive the highest standard of care. He is fluent in both English and Hindi, enabling him to communicate effectively with a diverse patient population. Dr. Srivastava is associated with Apollo Hospitals, where he continues to make significant contributions to pediatric healthcare. His clinical expertise is complemented by a compassionate approach, making him a trusted figure among parents seeking care for their children. With a commitment to progressive medical practices, Dr. Srivastava stays updated on the latest developments in paediatric nephrology, ensuring he provides state-of-the-art treatment options. His practice not only focuses on medical intervention but also emphasizes the importance of educating families about kidney health in children. Through his dedication and skill, Dr. R N Srivastava not only restores health but also instills hope in the families he works with.

6. Why do patients consult Dr. R N Srivastava?

Patients seek Dr. R N Srivastava's expertise for pediatric care, specifically Viral Fever Treatment, Growth & Development Evaluation/Management, and Thyroid Disease in Children. For a comprehensive list of his services, please refer to his professional profile.

7. Who is a Pediatrician?

A pediatrician, also known as a child specialist, is a medical doctor specializing in children's healthcare. They provide comprehensive care addressing physical, behavioral, and mental health needs, treating illnesses ranging from minor ailments to complex medical conditions. Pediatric care begins at birth.

8. What age range of children do your Paediatricians treat?

Apollo Hospitals' pediatricians provide care for children from birth through age 18. Infants (0-2 years) may require frequent visits, while children aged 2-5 typically need annual checkups. Annual visits continue until age 18. We offer comprehensive pediatric care throughout childhood.

9. Can a Pediatrician Perform Surgery?

Pediatricians focus on children's physical and mental health. While some pediatricians may perform surgery after specialized training, pediatric surgeons are specialists in surgical procedures for children. Pediatricians typically manage children's health through non-surgical means. Pediatric surgeons handle a wide range of procedures, from minor operations (e.g., foreign body removal) to complex surgeries such as cardiac surgery.

10. What does a pediatrician do?

Pediatricians provide comprehensive healthcare for children. Their services include administering vaccines, treating injuries (e.g., dislocations, foreign body removal), performing procedures such as circumcision and fracture reduction. They also conduct routine checkups and manage conditions affecting newborns and infants, ensuring optimal child well-being.
