5. How many years of experience does Dr. S V Nagavalli have?

Dr. S V Nagavalli possesses 14 years of experience in the medical field. Details of her professional history are available upon request.

6. Who is a General Physician?

A general physician (GP) is a medical doctor specializing in non-surgical adult healthcare. They treat various diseases not requiring surgery, encompassing cardiovascular, respiratory, neurological, hematological, endocrine, and gastrointestinal systems. Some GPs may further specialize within these areas.

7. What are the educational requirements to become a General Physician?

General physicians, also known as primary care physicians, require completion of medical school followed by a three-year residency in primary care. Prerequisites include a science-based bachelor's degree, a minimum GPA, and successful completion of medical school and basic medical training. This rigorous training is essential for primary care practice.

8. When should I consult a General Physician?

A General Physician (GP) is your first point of contact for most health concerns. GPs treat various conditions affecting the cardiovascular, respiratory, musculoskeletal, neurological, gastrointestinal, and endocrine systems, excluding those requiring surgery. Consult a GP for symptoms related to these systems.

9. Do General Physicians Offer Home Consultations?

General practitioners (GPs) provide comprehensive primary care, including physical examinations, immunizations, and treatment for various medical conditions across all age groups. Home consultations are at the discretion of the individual GP. Routine check-ups may be available at a patient's home.

10. Can a General Physician perform surgery?

No. General physicians specialize in primary care, offering non-surgical treatment for illnesses and injuries. Surgical procedures are performed by general surgeons. Physicians focus on primary care, building patient relationships, and utilizing non-surgical methods like medication and physical therapy.
