Dr Kiranmai Gottapu holds MBBS, MS(OBGY), FMAS, FGORS, reflecting her comprehensive education in the field of Obstetrics & Gynecology.

5. How many years of experience does Dr. Kiranmai Gottapu have?

Dr. Kiranmai Gottapu has 21 years of experience in Gynecology and Obstetrics.

6. Who is a Gynecologist?

A gynecologist is a specialist in women's reproductive health. They provide medical care for various conditions affecting women, including sexually transmitted infections (STIs), hormonal imbalances, breast health concerns, cervical cancer, and urinary tract infections. Gynecological care encompasses diagnosis and treatment of female reproductive system issues.

7. Is there a difference between a Gynecologist and an Obstetrician?

Yes, there's a distinction. A gynecologist specializes in the health of the female reproductive system, focusing on diagnosis, treatment, and prevention of diseases. An obstetrician specializes in pregnancy, childbirth, and postpartum care.

8. What procedures do Gynecologists/Obstetricians perform?

Gynecologists/Obstetricians commonly perform procedures including Pap smears, ultrasound screenings, endometrial biopsies, STI testing, colposcopy (cervix, vagina, vulva examination), pelvic exams, laparoscopy, mammography, fertility treatments (e.g., in-vitro fertilization), and surgeries such as Cesarean sections, fibroid removal, and hysterectomies. These procedures encompass women's health, from preventative care to complex surgical interventions.

9. Do Gynecologists/Obstetricians treat female infertility?

Yes, gynecologists/obstetricians treat female infertility. Their treatment may involve diagnosing infertility causes and providing solutions like hormone therapy, ovulation stimulation medications, infection treatment (antibiotics), and even IVF procedures.

10. How often should women visit a Gynecologist/Obstetrician?

Women should schedule annual gynecological checkups. These visits typically include a pelvic exam, Pap smear, blood tests, screening for sexually transmitted infections, and breast examination to maintain optimal reproductive health.
