## **6. Who is a Gynaecologist?**

A gynecologist is a medical doctor specializing in the female reproductive system. This includes the vagina, ovaries, uterus, and breasts. Gynecologists are also trained in obstetrics, managing pregnancy and childbirth.

## **7. What is the difference between a Gynaecologist and an Obstetrician?**

Gynecologists specialize in the female reproductive system's health. Obstetricians focus on pregnancy, childbirth, and postpartum care. Many gynecologists are also trained obstetricians. During pregnancy, consultation with either is possible; however, gynecologists should be consulted for general reproductive health issues.

## **8. What procedures do Gynaecologists and Obstetricians perform?**

Gynaecologists perform procedures like Dilation and Curettage (D&C), removing the uterine lining, and Hysteroscopy, a minimally invasive uterine treatment. Obstetricians manage childbirth through normal delivery and C-sections, providing surgical intervention when necessary for safe delivery. These specialists offer comprehensive women's healthcare, including pregnancy care and treatment of gynaecological conditions.

## **9. Does a Gynaecologist/Obstetrician treat female infertility?**

Yes, Gynaecologists/Obstetricians are qualified to manage female infertility and associated health concerns. A consultation allows for diagnosis, treatment options exploration, and specialist referral if necessary. Infertility treatment begins with a Gynaecologist/Obstetrician consultation.

## **10. How often should women visit a Gynecologist/Obstetrician?**

Women should consult a Gynecologist/Obstetrician annually for preventive healthcare. Annual exams facilitate early detection of reproductive health issues and serious conditions. Pregnant women require at least three visits during their pregnancy.
