Dr Khushboo Saxena holds a degree in MBBS, DNB, FCCP(USA), PDCC Sleep Medicine, FSM (ISDA), MNAMS. She provides treatments including Bronchoscopy, Pulmonary Function Tests, Oxygen Therapy. She specializes in treating conditions like Pleural Disease, Respiratory Disorders, Respiratory Tract Infection.

3. What is Dr. Khushboo Saxena's specialization?

Dr Khushboo Saxena specializes in Pulmonology. She has expertise in treating conditions such as Pleural Disease, Respiratory Disorders, Respiratory Tract Infection. Her key treatments include Bronchiectasis Treatment, Bronchial Asthma Treatment, Pneumonia Treatment.

4. What are Dr. Khushboo Saxena's medical qualifications?

Dr Khushboo Saxena holds MBBS, DNB, FCCP(USA), PDCC Sleep Medicine, FSM (ISDA), MNAMS, reflecting her comprehensive education in the field of Pulmonology.

5. How many years of experience does Dr. Khushboo Saxena have?

Dr. Khushboo Saxena has 12 years of experience in pulmonology. Her professional history provides a strong background in respiratory care.

6. What is a Pulmonologist?

A pulmonologist is a physician specializing in the diagnosis and treatment of respiratory diseases and conditions affecting the lungs.

7. What respiratory conditions do Pulmonologists treat?

Pulmonologists specialize in diagnosing and treating various respiratory illnesses, including asthma, bronchitis, pulmonary hypertension, emphysema, lung cancer, chronic obstructive pulmonary disease (COPD), cystic fibrosis, tuberculosis, and obstructive sleep apnea. These specialists provide comprehensive respiratory care and management.

8. When should I see a Pulmonologist?

Consult a pulmonologist if you experience: persistent cough; shortness of breath; difficulty breathing during exercise; unexplained weight loss with cough (over 4 weeks); bloody or pus-filled mucus; or if you are a smoker. These symptoms may indicate underlying respiratory issues requiring specialist care.

9. What tests will a Pulmonologist perform during a checkup?

A pulmonologist typically recommends pulmonary function tests (PFTs), which may include spirometry, lung volume tests, arterial blood gas analysis, lung diffusion capacity assessment, and pulse oximetry. Chest X-rays or CT scans may also be ordered, depending on the patient's specific needs. These tests help evaluate lung health and function.

10. What is the difference between a Pulmonologist and a Chest Surgeon?

Chest surgeons specialize in surgical procedures of the lungs and heart. Pulmonologists diagnose and treat lung diseases, sometimes using minimally invasive procedures like bronchoscopy to obtain lung samples, but they do not perform surgery.
