5. What is Dr. Kilambi Srinivas's experience?

Dr. Kilambi Srinivas has 30 years of experience as a General Surgeon.

6. Who is a General Physician?

A general physician (GP) is a medical doctor specializing in non-surgical adult healthcare. They treat various diseases not requiring surgery, encompassing cardiovascular, respiratory, neurological, hematological, endocrine, and gastrointestinal systems. Some GPs may further specialize within these areas.

7. What are the educational requirements to become a General Physician?

General physicians, also known as primary care physicians, require a science-based bachelor's degree, a strong GPA, successful completion of medical school, and foundational medical training. A three-year residency in primary care is mandatory for practicing general medicine.

8. When should I consult a General Physician?

Consult a general physician for a wide range of health concerns, including cardiovascular, respiratory, musculoskeletal, neurological, gastrointestinal, and endocrine issues manageable without surgery. They are the first point of contact for most health problems.

9. Do General Physicians Offer Home Consultations?

General practitioners (GPs) provide comprehensive primary care, including physical examinations, immunizations, and treatment for various medical conditions. They manage patients across age groups. Home consultations are at the discretion of the individual GP. Routine check-ups may be offered at home.

10. Can a General Physician perform surgery?

No. General physicians provide non-surgical primary care, managing illnesses and injuries with medication, physical therapy, and other non-invasive methods. Surgical procedures are performed by general surgeons, a different medical specialty. Physicians focus on building long-term patient

relationships and providing comprehensive primary care.
