Overview

Dr. Rashmi Jeenakeri is a highly skilled Neonatologist based in Bangalore, Karnataka, with an impressive 37 years of experience in her field. She holds an MBBS degree along with DNB in Paediatrics and is also a member of the Royal College of Paediatrics and Child Health (MRCPCH), showcasing her dedication to providing the highest standard of care for newborns and infants. Dr. Jeenakeri specializes in the delicate care of newborns, particularly those who are premature or have critical health issues at birth. As a focused practitioner in Neonatology, she is adept at managing complex conditions that affect neonates, making her a trusted partner for families during those crucial early days of life.

Dr. Jeenakeri is proficient in multiple languages, including English, Hindi, and Kannada, which allows her to communicate effectively with a diverse range of patients and their families, ensuring that every parent feels comfortable and informed about their child's health. Her compassionate approach and attentiveness to both her young patients and their families has earned her a reputation for excellence in the neonatal care community.

Dedicated to continuous professional development, Dr. Jeenakeri stays abreast of the latest advancements in Neonatology, integrating new techniques and technology into her practice. She is known for her collaborative approach, often working closely with pediatricians, nurses, and other healthcare

professionals to ensure comprehensive care for her patients. Dr. Rashmi Jeenakeri is indeed a valuable asset to the medical community in Bangalore, committed to improving neonatal outcomes and championing the health of newborns.

5. How many years of experience does Dr. Rashmi Jeenakeri have?

Dr. Rashmi Jeenakeri possesses 36 years of experience in Pediatrics.

6. Who is a General Physician?

A general physician (GP) is a medical doctor specializing in non-surgical adult healthcare. They treat various diseases not requiring surgery, encompassing cardiovascular, respiratory, neurological, haematological, endocrine, and gastrointestinal systems. Some GPs may further specialize within these areas.

7. What are the educational requirements to become a General Physician?

General Physicians, also known as primary care physicians, require a bachelor's degree in science with a minimum GPA, followed by medical school and completion of a three-year medical residency in primary care. This post-graduate training is a prerequisite for practice.

8. When should I consult a General Physician?

Consult a general physician for a wide range of non-surgical health concerns. These include cardiovascular, respiratory, musculoskeletal, neurological, gastrointestinal, and endocrine system issues. A general physician is often the first point of contact for any health problem.

9. Do General Physicians offer home consultations?

General practitioners (GPs) provide comprehensive primary care, including physical exams, immunizations, and treatment for various conditions. They often manage long-term patient care across age groups. Offering home consultations is at the discretion of the individual GP; however, routine check-ups may be available at home.

10. Can a General Physician Perform Surgery?

No. General physicians provide non-surgical primary care, managing illnesses and injuries with medication, physical therapy, and other non-invasive methods. Surgical procedures are performed by general surgeons, a separate medical specialty. Physicians focus on building long-term patient relationships and delivering comprehensive primary care.
