4. How many years of experience does Dr. Achal Bhagat have?

Dr. Achal Bhagat has 37 years of experience in the medical field. His extensive career spans numerous years of service and patient care.

5. Who is a Psychiatrist?

A psychiatrist is a medical doctor specializing in mental health. They provide comprehensive care for mental, emotional, and addictive disorders, including prevention, diagnosis, and treatment of conditions such as anxiety, depression, psychosis, substance abuse, sexual dysfunction, and developmental disabilities.

6. Is a Psychiatrist different from a Psychologist?

Psychiatrists and psychologists are distinct medical professionals providing specialized care.

Psychologists hold doctoral degrees (Ph.D. or PsyD) in clinical psychology, focusing on therapy and behavioral interventions. Conversely, psychiatrists are medical doctors (MDs) with specialized training in diagnosing, treating, and preventing mental illnesses, often utilizing medication as part of their treatment approach. Their expertise encompasses both psychological and biological aspects of mental health.

7. When should I consult a psychiatrist?

Psychiatrists treat mental, emotional, and behavioral health issues. Seek consultation for mental disorders such as anxiety, depression, schizophrenia, or bipolar disorder. Unexplained behavioral changes also warrant a psychiatric evaluation. Psychiatric care is necessary for mental or emotional problems stemming from substance abuse.

8. What conditions do psychiatrists treat?

Psychiatrists diagnose and treat a wide range of mental, emotional, and behavioral health issues. These include depression, anxiety, post-traumatic stress disorder (PTSD), obsessive-compulsive disorder (OCD), Asperger's syndrome, alcohol addiction, stress, burnout, eating disorders, and schizophrenia. They also address disorders stemming from substance abuse.

9. Can a psychiatrist treat anxiety disorders?

Yes. Psychiatrists are qualified healthcare professionals trained to diagnose and treat anxiety disorders. Anxiety disorders, affecting one in three individuals, involve persistent, overwhelming anxiety impacting daily life. Treatment from a psychiatrist may include both medication and psychological therapies.
