### 5. How many years of experience does Dr. Avala Ravi Charan have?

Dr. Avala Ravi Charan has 15 years of experience in pulmonology. His professional history is available upon request.

### 6. What is a Pulmonologist?

A pulmonologist is a physician specializing in the diagnosis and treatment of respiratory diseases and conditions affecting the lungs.

## **7. What respiratory conditions do Pulmonologists treat?**

Pulmonologists specialize in diagnosing and treating various respiratory illnesses, including asthma, bronchitis, pulmonary hypertension, emphysema, lung cancer, chronic obstructive pulmonary disease (COPD), cystic fibrosis, tuberculosis, and obstructive sleep apnea. These specialists provide comprehensive respiratory care and treatment.

## **8. When should I see a Pulmonologist?**

Consult a pulmonologist if you experience symptoms such as persistent cough, shortness of breath, difficulty breathing during exercise, unexplained weight loss (with cough for over 4 weeks), bloody mucus with pus, or if you are a smoker. These could indicate respiratory issues requiring specialized medical attention.

## **9. What tests will a Pulmonologist perform during a checkup?**

A pulmonologist may recommend pulmonary function tests (PFTs), encompassing spirometry, lung volume tests, arterial blood gas analysis, lung diffusion capacity assessment, and pulse oximetry. Imaging studies such as chest X-rays or CT scans may also be ordered, depending on the patient's specific requirements.

## **10. What is the difference between a Pulmonologist and a Chest Surgeon?**

Chest surgeons operate on the lungs and heart. Pulmonologists diagnose and treat lung diseases; they may perform procedures like bronchoscopy to obtain lung samples but do not conduct surgery.
