He provides treatments including Cataract surgery (phacoemulsification), LASIK and refractive surgery, Intravitreal injections for retinal diseases. He specializes in treating conditions like Cataracts, Glaucoma, Diabetic retinopathy.

3. Why do patients choose Dr. Chandran Abraham?

Patients seek Dr. Chandran Abraham's expertise for scleral contact lenses, vision therapy exercises, and glaucoma evaluation and treatment. For more detailed information, please consult the doctor's profile.

4. What is Dr. CHANDRAN ABRAHAM's specialization?

Dr CHANDRAN ABRAHAM specializes in Ophthalmology. He has expertise in treating conditions such as Cataracts, Glaucoma, Diabetic retinopathy. His key treatments include Cataract surgery (phacoemulsification), LASIK and refractive surgery, Intravitreal injections for retinal diseases.

5. What are Dr. CHANDRAN ABRAHAM's medical qualifications?

Dr CHANDRAN ABRAHAM holds MBBS, DO, reflecting his comprehensive education in the field of Ophthalmology.

6. How many years of experience does Dr. Chandran Abraham have?

Dr. Chandran Abraham has 39 years of experience in ophthalmology.

7. Who is an Ophthalmologist?

An ophthalmologist is a medical doctor specializing in comprehensive eye care and vision correction. They diagnose and treat a wide range of eye diseases and conditions. As medical doctors, ophthalmologists can also provide referrals to other specialists when necessary.

8. Is an Ophthalmologist different from an Optometrist?

Yes, ophthalmologists and optometrists offer distinct eye care services. Optometrists manage common eye conditions and some chronic diseases such as glaucoma. Ophthalmologists address a broader range of eye disorders, including complex issues requiring surgical intervention.

9. Can an Ophthalmologist perform eye surgery?

Yes, ophthalmologists are qualified surgeons. Their extensive training encompasses various subspecialties such as eyelid, retinal, and pediatric ophthalmic surgery. Surgical procedures performed may also depend on hospital or surgical center needs.

10. How can an ophthalmologist help with cataracts?

Ophthalmologists diagnose cataracts using eye exams such as slit-lamp examinations, retinal examinations, and visual acuity tests. Cataract removal requires surgery where the clouded lens is replaced with an artificial intraocular lens (IOL), restoring clear vision. Pre and post-operative care is also provided by the ophthalmologist.
